RELAX GLASS MODULAR

The **RELAX GLASS series** can be extended to a multifunctional system with light (RELAX GLASS LIGHT), cooling (RELAX GLASS NOZZLES), loudspeakers (RELAX GLASS SOUND) and panels (RELAX GLASS BLENDE). To connect the modules on switch side, a 10 cm connector (MODULAR DISTANCE) with connecting screws (MODULAR CONNECTOR) is required. The connection of smooth sides only requires the connecting part. All RELAX MODULES are also available as stand-alone products*.
